My Monstrosity

Do you hear me, my pulse's exceptional rate
I believe there's a trap that's been laid out for me
I am feeling their eyes on me, gasping for air
Could it be that my mind is playing tricks on me

I am guilty of pleasures not up to debate
A disease that gives way to insecurity
How demeaning, exposed to commiserative stare
Set me free, fighting misconceived reality

I admit to my monstrosity
Anger defies my control
We are born into a world where
Living means playing a role
My hope is I'll see the day
I will have the means to repay
For all that you've done
For all you have done to my soul

I am weary of having to put up with hate
Don't you see my conflicted personality
I'm revealing myself, my emotions lie bare
The salvation of my deranged psychology

Dancer in the Dark

You never believe me
Living the moment until it's gone
You wouldn't see me
Carried away by the break of dawn

Now I should have warned you
Struck by the fears that you gave to me
Ball of confusion
Telling me where do we go from here

And you feel like a dancer in the dark
When you see that the world is turning
We will all be like dancers when
Darkness falls again

And you feel like your waiting for a spark
As you hear our children yearning
We will all be like dancers when
Darkness falls again

I couldn't stop you
This is the end yet you carry on
You wouldn't listen
Lord has no mercy on Babylon

How was I supposed to
Know that we were just make believe
Just an illusion
Images that we were meant to see

And you feel like a dancer in the dark
When you see that the world is turning
We will all be like dancers when
Darkness falls again

And you feel like your waiting for a spark
As you hear our children yearning
We will all be like dancers when
Darkness falls again

And you feel like a dancer in the dark
When you see that the world is turning
We will all be like dancers when
Darkness falls again

And you feel like your waiting for a spark
As you hear our children yearning
We will all be like dancers when
Darkness falls again
Dancer in the dark

A Dancer in the dark

Today is the day
You were waiting for the sign
Don't go this way
You'll be headed for the border line

(Dancer in the dark)

You'll be headed for the border line

You'll be headed for the border line

(You'll be headed for the border line)

(Dancer in the dark)

Last Chance

The message read:

"I don't need love, just sex no strings attached"
If anything this is the past to me
You bailed out on me through the escape hatch

It doesn't matter
It cannot be undone
Do you feel better by telling me your not in love

You messed up your last chance
Nothing you're about to say or do
I won't let you make amends
There is so much love around you
So much love you won't get down to
Sad that in the end it all makes sense
You missed your last chance

(No love just sex no strings attached)
(No No No love just sex no strings attached)

The aftermath is haunting me
It's getting me off track
You burden me unbridled psychopath
I need to get that monkey off my back

Mind over matter
The past can't be outrun
The future is shattered
Repelling I have had enough

You messed up your last chance
Nothing you're about to say or do
I won't let you make amends
There is so much love around you
So much love you won't get down to
Sad that in the end it all makes sense
You messed up your last chance

There is so much love around you
There is so much love around you

(No love just sex no strings attached)
(No No No love just sex no strings attached)

You messed up your last chance
Nothing you're about to say or do
I won't let you make amends
There is so much love around you
So much love you won't get down to
Sad that in the end it all makes sense
You messed up your last chance
There is so much love around you

You messed up your last chance
There is so much love around you

You messed up your last chance
There is so much love around you

You messed up your last chance
There is so much love around you

Trockenfallen Lassen

Geborgte zeit
Nicht Unendlich lang
Nur eine momentaufnahme
So nimmt es seinen gang

Das rad gedreht
Du warst niemals leise
Was dir nun bleibt
Ein boot
Für das letzte stück der reise

Das ist der moment
Wenn du den sog der welle nicht mehr spürst
Die dich an horizonte treibt
Fühlst du die stille und geniest die einsamkeit
Du wartest, dass die wolken weiterziehen
Allein im meer gestrandet
Lässt du die gedanken fliegen

So viel gelebt
Doch so lange her
Als ihr letzter vorhang fiel
Brannte dein herz nicht mehr
Endlicher schmerz
Schreibt die letzte zeile
Auf dass die verbliebene zeit
Niemand deine wunden heile

I Watch My Life on TV

You know, I would give it all up
Anything to make this insanity stop
Wipe the slate clean
But it seems
We just can't pick and choose

Remember we tore it all down
Set afire
Watching our world spin around
Turning your frown upside down
Not playing by the rules

(We used to be magic)
I didn't mean to let you down
It's never gonna be alright
If only I could've known
What's on your mind
(We used to be magic)
Now you are smiling at me from the screen
If only I could've known
What's on you mind
(We used to be magic)

They named us the talk of the town
Wild, Undone
Partying second to none
Something else and then some
We closed down every bar

Oh Baby, just look at us now
What we've become
A veg in a nursery home
Making his cemetery rounds
You're lazing in the ground

(We used to be magic)
I didn't mean to let you down
It's never gonna be alright
If only I could've known
What's on your mind
(We used to be magic)
Now you are smiling at me from the screen
If only I could've known
What's on you mind

If only I could've known
What's on you mind

(We used to be magic)
(Now you are smiling at me from the screen)
If only I could've known
What's on you mind
(We used to be magic)
Now you are smiling at me from the screen
If only I could've known
What's on you mind

I didn't mean to let you down
It's never gonna be alright

I didn't mean to let you down
It's never gonna be alright

I didn't mean to let you down

(We used to be magic)

I didn't mean to let you down

Electricity

Getting high on the slipstream
Tangled faulty circuitry
Waking up from my worst dream
Burning electricity

Lightning strikes and it hits me
Out of probability
Pieces torn from the memory
Burning Electricity

All of a sudden she couldn't stand the energy
She's lightning and flames
She's burning electricity

This is forever
This night is forever
I believe
We love for the obvious reasons
Love me now

Toxic waste in the bloodstream
Cerebral duplicity
Can't figure out where my mind's been
Burning electricity

Arc discharge from the light beam
Change of personality
Fall right back to a halcyon dream
Burning electricity

This is forever
This night is forever
I believe
We love for the obvious reasons
Always
Love me now

Burning Gasoline

"God is dead. We've taken his place."

We climb the highest mountains
We dive the deepest seas
We soil the purest fountains
There is no planet B

And while we're walking on the moon
Our home is dying
And while we're flying to the stars
Our eyes are shut

What goes around
Comes around
With heads held high
Our chips are down
We're running out of time
While we are burning gasoline
We're far from feeling
Safe and sound
We're seeking shelter underground
We're running out of time
While we are burning gasoline

We light the darkest jungles
We make the biggest sales
And so the cookie crumbles
Too much we tipped the scales

And while the sun's melting the ice
Oceans are rising
And while we're doomed and left to die
These morons lie

I Hope You're Not Easily Scared

Why do I
Keep constantly sending a signal
A beacon for the stranded
A lantern for the lonely souls
I consign myself to the unjustifiable
The demons that are haunting
Turning me into one of their own

(Oh)

Why am I
Consumed by the dark and abysmal
It seeks me out, it pulls me in
Making me do things I've never known
He said, my job is to take out the vermin
She smiled like lemon Popsicle
Cause he took the words right out of her mouth

This is exactly what I do (Oh)
This is the thing that helps me getting through (Oh)
I hope you're not easily scared
By the look on your face
I figured you might

You know that I
Have always been taken for granted
Gaslighted in disbelief
A state that I thought I had long outgrown
Wish I could put all the pieces together
They all come back those memories
Of places that have never felt like home

Some are meant to fall
Bad blood turns to stone
You only get to reap
What you have sown
You're not alone
I feel for you

This is exactly what I do (Oh)
This is the thing that helps me getting through (Oh)
I hope you're not easily scared
By the look on your face
I figured you might be

This is exactly what I do (Oh)
This is the thing that helps me getting through (Oh)
I hope you're not easily scared
By the look on your face
I figured you might
