# **Re-Invent Yourself**

Back in my room again A smell of cheap perfume Trapped in myself again Prepared to meet my doom

Permanent reflection A need for mental food Afraid of my actions Here in this solitude

So predictable And conventional Just re-invent yourself Nothing fictional It's only natural So re-invent yourself

Mental infection The answer lies in you Far from perfection There's so much work to do Broaden my perception Can't see the wood for the trees Things lose their attraction I hate this lazy me

So predictable And conventional Just re-invent yourself Nothing fictional It's only natural So re-invent yourself

So predictable... So conventional

# Ride on a Star

You reach out your hands To the mere pretence You dream to be a part Of this perfect world Wear your tempting grin You'd do anything Whatever it takes To be his favourite girl

Now you feel so real You take a ride on a star tonight Now you feel so real You burn so bright For your star tonight Now you feel so real You take a ride on a star tonight Now you feel so real Your dreams will die For your star tonight

The fake world you adore What did you take it for You were just a pleasant change In this unreal world Never belong to him You didn't mean anything You were just another Willing and stupid girl

Now you feel so real You take a ride on a star tonight Now you feel so real You burn so bright For your star tonight Now you feel so real You take a ride on a star tonight Now you feel so real Your dreams will die For your star tonight

Now you feel so real...

## Self-Deception

- I'm unclean Undress me So unreal The frame I see I stand stripped to the waist Before myself Is it really me Or what I'm trying to be
- I won't drown In my tears And go down In my fears I am stripped to the skin I feel ashamed Is it really me What I pretend to be

This life is just an illusion A dream that never ends I'm always trapped in confusion On lies it all depends If this is just an illusion Made up in somebody's mind I have to draw the conclusion It must be someone unkind

I won't lose My trust again So untrue It's still the same So I strip off my skin To ease the pain Is it really me What I believe to see

#### Foreigner

Coming from the stars Into that space No healing When a lonely heart's displaced Left behind In a foreign land So should he dare To reach out his small hand

He's a foreigner He will never be same A foreigner Wants to be from where he came

Coming from the stars Into that world So far away From what he calls his home A begging to be free To let him go A groaning scream Surrounding any soul

He's a foreigner He will never be same A foreigner Wants to be from where he came

He's a foreigner...

#### Anywhere

When I'm lonely Deep inside A defending hand Takes me to a friend When I'm falling Asleep to dream Of a naked dawn Something keeps me warm

I feel better now That you are so close to me You make me high Anywhere I can taste the joy When I feel so close to you You make me high Anywhere

When I'm leaving That safe place Someone knows my way In the deepest grey And when I'm missing Your safe home I know I'm secure Everything's so pure

I feel better now That you are so close to me You make me high Anywhere I can taste the joy When I feel so close to you You make me high Anywhere

# Blue Moon (Void-Style-version)

Stories of the past Make my heart ache The shining of the stars Will make the earth quake Gone too far The angels start to sing DAS ENDE IST NAH And pain is what it brings

I found heaven, I found joy And peace within my mind In the sand, in the grass In the hill of the land called Blue Moon

I heard it in a dream Don't sell your soul Now there's a need to scream A need to change my role 'Cause stories of the past Make my heart ache Time goes too fast For my sake

I found heaven, I found joy And peace within my mind In the sand, in the grass In the hill of the land called Blue Moon

### Freedom

I need an overdose of life My secret to survive To get a big kick out of live I always go against the tide I burn so fast but bright And never see the red light

Don't keep your eyes on every step I take Don't restrict me in every move I make I wanna be free Just take your hands off me I gotta be free No-one else can live my life for me

Despite of any consequence Whatever makes no sense I hold the whole world in my hands And when I feel I'm out of sight The chemical delights Will lead me safely through the night

Don't tell me what I'm supposed to do I am the only one who pulls me through I wanna be free Why don't you let me be I gotta be free Oh, why can't you just see I wanna be free Just take your hands off me I gotta be free No-one else can live my life for me

Don't steal the air from every breath I take I don't give a shit for all the rules I break I wanna be free Why don't you let me be I gotta be free Oh, why can't you just see I wanna be free Just take your hands off me I gotta be free No-one else can live my life for me

#### A Prayer

Once I had a dream before I woke up When I try to walk I fall asleep Don't know where I'm going to, I don't even know where I have been But still I try to realize the truth That I have seen

So I pray Please, help me, please Please, help me, please Please, help me, please Please, help me, please

Reveal the precious spell of every moment Inhale the flow of life in every second Rely upon the spirit that you hide Behind a lie I will keep on trying till the day That I die

And I pray Please, help me, please Please, help me, please Please, help me, please Please, help me, please

Take my fear away Don't lead me astray Take my fear away Don't lead me astray

Please, help me, please Please, help me, please Please, help me, please Please, help me, please

Help me to stay on this road and Don't lead me astray

# Hope Won't Die

No matter what you say, You know you're guilty Nothing could excuse this circumstance You can clean your hands But your mind stays filthy You always trip on your own demands And hope won't die Just go on and pray the saint And hope won't die But no-one else can hear your plaint Now you want to fall into oblivion Will that make it easier for you First of all you need to be forgiving 'Cause the one who suffers most is you You want to live without restraint No matter what you say You know you're guilty You can clean your hands But your mind stays filthy Nothing could excuse this circumstance You always trip on your own demands And hope won't die Just go on and pray the saint And hope won't die But no-one else can hear your plaint You want to live without restraint...

#### Give in

Give in Go on and live in sin Give in Your ugly face always seems to win Give in That feeling goes under your skin It calls you from deep within I'm staring out of empty eyes

Give in And let some reason in Give in The time have come for a new begin Give in The fever burns under your skin It haunts you deep within Don't listen to your empty lies

Give in Go on and live in sin Give in Your ugly face always seems to win Give in That feeling goes under your skin It calls you from deep within I'm staring out of empty eyes

#### Remember

Don't give in And blow out everything That once was you That you'll be You always were so free Free as a bird In a cage Longing for the final stage And so I sing For you 'Cause it breaks my heart in two

Always remember That you will find A reason to live your life Always remember That deep inside Your true will is still alive Always remember...

No, don't give in And let your heartache win These days were meant To decline Your dreams were never mine And still you're more To me Than a fading memory That's why I sing For you There's nothing else for me to do

Always remember That you will find A reason to live your life Always remember That deep inside Your true will is still alive Always remember...
