# Come Together

Slow down, young one  
What's the big rush?  
Soon you will learn  
It's both our turn

Can you hear me?  
Do you feel me?  
Two hearts beating  
Heavy breathing

Don't stop 'til you've had enough  
The two of us, let's come together  
Take control and get on top  
Just flip a spot, let's come together

There are some things worth the waiting  
A total force is in the making  
Bated breath, anticipating  
Self-control so quickly fading

Moving faster  
Alabaster  
Senses shatter  
Nothing matters

Don't stop 'til you've had enough  
The two of us, let's come together  
Take control and get on top  
Just flip a spot, let's come together

Give to me complete surrender  
All we really need is pleasure  
Make this moment last forever  
We can leave this world together

Give to me complete surrender  
All we really need is pleasure  
Make this moment last forever  
We can leave this world  
Together

Let's come together  
Let's come  
Let's come together  
Let's come  
It's now or never  
Let's come  
Let's come, let's come, let's come together

## A Matter of Time (Stadium mix)

And there you were; your beauty caught my by surprise  
I held my tongue in silence, taken  
In all my life, I never dreamed someone like you  
Could be true; now I know it's you

Wherever you are, I'll be waiting  
I'm tearing apart anticipating  
It will not be long until you'll be mine  
You'll give me your heart; just a matter of time

Then you were gone; you disappeared right out of sight  
You were the one, above all, I knew  
You left a hole deep in my heart that will not heal  
The time has come to find you; I will

Wherever you are, I'll be waiting  
I'm tearing apart anticipating  
It will not be long until you'll be mine  
You'll give me your heart; just a matter of time

And there you are; I can't believe my own two eyes  
The day has come; I found you, it's true  
All this time, and now I finally realize  
My wish come true; now I'm here with you

Wherever you are, I'll be waiting  
I'm tearing apart anticipating  
It will not be long until you'll be mine  
You'll give me your heart; just a matter of time

I want you, I need you  
I've got to be near you

Wherever you are, I'll be waiting  
I'm tearing apart anticipating  
It will not be long until you'll be mine  
You'll give me your heart; just a matter of time

## Temporary (The Synthetic Dream Foundation mix)

Thoughts in my head of the end that awaits me  
No turning away I hope and I pray for one more day  
When all has been said the sum equals nothing  
The endless debate of free will and what's fate won't solve a thing

You and me are nothing more than temporary  
You are me, there's no wall it's all imaginary

People I see so lost in the shuffle  
Caught up in the game they cannot escape the cage they've made  
Day after day we fight and we squander  
The more that we take the further we stray from what we need

We, we are running out of time  
What are we all waiting for?  
What are we really running from?

# The World Belongs to Us (live at Budokan mix)

Look around at the world today  
Our precious home withers in decay  
What once was whole is now torn and stained  
Do you wonder how it got this way?

The years will come  
The years will go  
Kingdoms rise and fall  
The time has come to take control  
The world belongs to us

Long ago, a choice was made  
The few would rule, the rest obey  
Now we are taught how to behave  
Don't question why, and don't complain

The years will come  
The years will go  
Kingdoms rise and fall  
The time has come to take control  
The world belongs to us  
A single drop of water becomes a mighty fall  
People of the earth  
The world belongs to us

Now it's time to demonstrate  
That you and I can make history  
Tear down the walls that separate  
To make us weak and keep us afraid

The years will come  
The years will go  
Kingdoms rise and fall  
The time has come to take control  
The world belongs to us  
A single drop of water becomes a mighty fall  
People of the earth  
The world belongs to us

# It Was Like I Was Dreaming

## Entropy (More Cowbell mix)

No, not today  
Can't agree; why do we endure all this suffering?  
When we're to blame  
Comes to me so easily; life is the discovering

Gone out to sea; I swim alone  
No life guard to save my soul  
The waves high, the water cold  
And where it ends I'll never know

There's too much fantasy; back to reality  
It's such a waste of time just waiting for an answer  
There is no escape from our mortality  
See what you want to see; entropy's my only master

Now is the day  
Everything you can see; time's a singularity  
Go all the way  
Don't believe what you see; there will be no stopping me

Gone out to sea; I swim alone  
No life guard to save my soul  
The waves high, the water cold  
And where it ends I'll never know

There's too much fantasy; back to reality  
It's such a waste of time just waiting for an answer  
There is no escape from our mortality  
See what you want to see; entropy's my only master

Entropy's my only master

There's too much fantasy; back to reality  
It's such a waste of time just waiting for an answer  
There is no escape from our mortality  
See what you want to see; entropy's my only master

# Predator

The skill of the hunter  
The will to survive  
The thrill of a new chase  
The chill of the night

There's no use resisting  
The call of the wild  
I feel a hunger growing  
Another meal's in sight

Are you lonely  
Are you lonely  
Are you lonely  
Are you lonely

I'll wait until your guard's down  
I'll tell you what you need  
A Wolf in sheep's clothing  
Oh I'm not what I seem

We are pieces of a game  
We are beasts that never tame

Object of my desire  
The target in my sight  
Right now there is no other  
And you'll be mine tonight

It's all been planned you see  
You will not get away from me  
I cannot wait to get to know you better

Just spend some time with me  
We won't discuss philosophy  
One thing's more interesting  
I'll show you  
You'll know

Run and hide  
Or be my animal sacrifice  
'cause I'm the predator  
Try to fight  
You'll prove no challenge  
To my appetite  
I'm right behind you

I thought I had it all  
Then you saw through  
My camouflage  
And sent me home  
Without my dinner alone

You might have won for this round  
It's just a stupid game  
You won't get away next time  
I'll catch you in the end

## My True Love (Pulse State mix)

My true love - the only one for me  
And the other there will never be  
My true love - always there for me  
When I'm feeling so lonely  
My true love calls my name  
That's when I go running  
My true love will never let me down  
Please don't let me down

The more that I see you  
The more that I need you  
This feeling just won't go away

I can't live without you  
I won't ever doubt you  
I'm begging you - don't go away

My true love whispers to me  
Tells me all the things that I want to hear  
My true love takes over me  
Will never let me go, never set me free  
My true love is my everything  
Everything I am, all I'll ever be  
My true love will never let me down  
Please don't let me down

The more that I see you  
The more that I need you  
This feeling just won't go away  
(Won't go, won't go away)

I can't live without you  
I won't ever doubt you  
I'm begging you - don't go away  
(Don't go, don't go away)

You have left your mark on me  
I will never be the same  
Even if I walk away

Your heavenly embrace  
Not so easy to erase  
Will I ever have the strength  
To say goodbye to you

The more that I see you  
The more that I need you  
This feeling just won't go away

I can't live without you  
I won't ever doubt you  
I'm begging you - don't go away

## Night and Day (Arena mix)

I want so much to hold you in my arms close  
It's like a lifetime passed me by just yesterday  
And the only thought that gets tomorrow  
Is that you will soon be near me by night and day

I dream about you in every way  
I can't live without you  
Now that you know  
I never wanna be without you  
Will you find your way to me?

The more that I go  
Another day alone without you  
Feels like eternity  
Night and day

My love for you continues to grow stronger  
The only thought of you makes my body ache  
I'm not sure if I can take this too much longer  
I am counting every second, night and day

I dream about you in every way  
I can't live without you, no, no  
Now that you know  
I never wanna be without you  
Will you find your way to me?

The more that I go  
Another day alone without you  
Feels like eternity

I want to see you, hold you  
Reveal my love for you, for deep and never ends  
Say the words to you I've always meant to say  
Say that we should be together night and day

## Don't Be Afraid (Very mix by Claire Voyant)

There are times  
when the world feels like it's closing in on us  
There are times  
when our doubt and fear can get the best of us  
It's not so surprising it feels like you're dying,  
the moment when everything starts falling apart  
You don't realise it, but you can survive it,  
the only thing you need to do is follow your heart

Don't be afraid,  
in the morning you will know  
you won't feel this way for long  
I'm saying don't be afraid,  
see how far that you've come,  
you have only just begun to make it

You will find there is more to you when you begin to try,  
you will find that life's hardest parts become your favorite times  
Just keep your eyes set on the horizon,  
even when everything is falling apart  
You won't need reminding or require guiding,  
as long as you remember just to follow your heart

Don't be afraid,  
in the morning you will know  
you won't feel this way for long  
I'm saying, don't be afraid,  
see how far that you've come,  
you have only just begun to make it

Don't run away  
Don't hide inside  
don't dig a hole,  
jump in and close your eyes  
there's a stand to make,  
you got a chance to take,  
don't let it slip away  
Now everything bends before it breaks

Don't run away  
Don't hide inside  
Don't dig a hole,  
jump in and close your eyes  
there's a stand to make,  
you got a chance to take,  
don't let it slip away  
Now everything bends before it breaks

Don't be afraid,  
in the morning you will know  
you won't feel this way for long  
I'm saying, don't be afraid,  
see how far that you've come  
you have only just begun to make it

Don't be afraid,  
in the morning you will know  
you won't feel this way for long  
I'm saying, don't be afraid,  
see how far that you've come,  
you have only just begun to make it

# Falling

Standing there without a care  
So far away from home  
By myself yet unaware  
That I was not alone  
All my dreams could not prepare for what was soon to come  
Standing there without a care, that's when you came along

You're in my arms, you don't even know me  
I don't know you, I want you to show me  
I don't need to know where this is going  
I'm falling, I'm falling, I'm falling for you

You're in my arms, you don't even know me  
I don't know you, I want you to show me  
I don't need to know where this is going  
I'm falling, I'm falling, I'm falling

Let us make a quick get away, so we might be alone  
Getting late no time to waste. There's so much to explore  
Something rare is in the air, too real to be ignored  
It's as if though hands of fate have brought you to my world

You're in my arms, you don't even know me  
I don't know you, I want you to show me  
I don't need to know where this is going  
I'm falling, I'm falling, I'm falling for you

You're in my arms, you don't even know me  
I don't know you, I want you to show me  
I don't need to know where this is going  
I'm falling, I'm falling, I'm falling for you

We lose ourselves, we shed our clothes  
We share our hopes, we bare our souls  
We lose ourselves, we shed our clothes  
We share our fears, we bare our souls

With the sun the time has come  
For now you have to go  
Not quite sure what I should say  
I stumble with the words  
As I watch you turn away and walk on out the door  
In my heart I hope and pray one day there will be more

You're in my arms, you don't even know me  
I don't know you, I want you to show me  
I don't need to know where this is going  
I'm falling, I'm falling, I'm falling for you

You're in my arms, you don't even know me  
I don't know you, I want you to show me  
I don't need to know where this is going  
I'm falling, I'm falling for you

# The End
