## Overture

# Fear Always Comes

Even now  
I can feel you  
In the wind

I was never alone  
You are still here  
In my mind

So when I see  
How the sky fall into pieces  
And the walls close even more  
The sun goes out and we embrace  
The darkness to repeat a lie inward

The answer next to you  
But fear will always come,  
As a desire inside  
Dying deep in to your heart

I don't believe in live this nightmare  
I don't believe in enjoying suffering  
I want to live other chances  
Another world where you do not have to cry

Even now  
I can't lie to you  
No again

You are stuck  
And the past  
Is repeated

# Venus

Esconde tus pasos  
Lo sabes hacer  
Está decidido  
Así debe ser

Entra despacio  
Será silencio  
Cierra la puerta detrás de ti

Hazme olvidarla  
Hazme caer  
Duele pensarla  
Ayúdame

Es por lo que yo te pague  
Es nuestro momento hasta amanecer

Que mi ser se diluya en tu piel  
Y que sus labios nos vuelvan a ser  
Mi altar y mi final  
Que todo se acabe esta vez  
Y al salir de tu cuerpo saber  
Que ya no está  
Ella no está

Siento tu tacto  
Se pierde su voz  
Tantas batallas pasaron por ti

Es solo un momento  
Horas de tu tiempo  
Solo tus manos  
Sabrán de mi

Y mientras la olvido  
Descansaré  
Entre tus piernas  
Lluvia seré

Es nuestro momento por hoy  
Deseo, aliento y adios

# One (feat. Felix Marc)

No one tells us how to be  
No one has the easy answer

Lies and pain  
Words spoken without reason  
My mind is waiting for the truth

We can fly or we can fall to pieces  
But we will never accept a given destination

Please forget all that we seem to know  
A million spells, black and white  
In the land of knowledge taught with blood  
We can listen, or we can speak up

No one tells us how to be  
No one has the easy answer  
The false prophet wants to direct us  
When there is no reason why  
Please tell me how you feel  
Please tell me that you feel alive  
If you trace the light in shadows  
So we can free the power of one

# Love Is Imperfection

Alone, you don't have to be alone  
You don't have to live in pain  
You don't have to lose again

On your skin, on your skin  
The marks of the past  
In your eyes, in your eyes  
A river of your tears

At the end, at the end  
We go back to ashes  
To be reborn, to reborn  
To spread again your wings

Mine  
You will be only mine  
To bring down your past  
Just take my hand again  
And let your body learn  
We dance in the rain  
Enjoying living in the dark

You are the dream

# Not Your Savior (feat. Xavier Morales)

You know what I feel  
You know what I want  
You know my sorrows  
You know all my flaws

You know I'm not the best man in the world  
We don't want to be alone  
I will never be your savior  
This will not be a dream  
Just a matter of lust

You can take my dirty hands  
You can take my frozen heart  
To make you company  
I'm so close to your skin  
You are so far from my soul  
And that's how we like to be

We do not need to live  
A great fantasy  
We know this road  
We know that curse

You know I'm not the best man in the world  
We don't want to be alone  
I will never be your savior  
This will not be a dream  
Just a matter of lust

# Ojos bien cerrados

Aquí estas, pero no  
Cuanta razón decías tener

Continuará juego  
Disfrutaré ser dueño  
Por un día de tu piel

No eres algo especial  
Viste tu cuerpo vete ya  
No busques mas aparentar  
Algo que tu ya no serás

Te iras, pero no  
Cosas que no deseas perder  
Dominaré tu fuego  
Estará en paz tu ego  
Hasta un día pare tu sed

# Eclipse

Ecos de una voz, cenizas  
La sombra ocultará  
La furia en ti

Intenta olvidar, realmente da igual  
Nada cambiara, solo sera, lo mismo

No hay bien ni mal  
No es el tiempo ni el lugar  
Para lamentar  
El apetito aguardará  
No hay vuelta atrás  
Si aun el sueño es latente  
Se quemará para siempre  
Ahora estas fuera de mi mente

No despiertes aun sin mi  
Mil lunas eclipsan detrás de ti  
Oh nos mata el palpitar  
De un corazón tan frio  
Que solo encuentra alivio al lastimar

No hay bien ni mal  
No es el tiempo ni el lugar  
Para lamentar  
El apetito aguardará  
No hay vuelta atrás  
Si aun el sueño es latente  
Se quemará para siempre  
Ahora estas fuera de mi mente

No despiertes aun sin mi  
Mil lunas eclipsan detrás de ti  
Oh nos mata el palpitar  
De un corazón tan frio  
Que solo encuentra alivio al lastimar

# Relocate (feat. Felix Marc)

We cannot hide those emotions  
We cannot continue pretending  
We seek the light that this oppression won't give us  
We should live only one day at a time

Just dance  
Forget your dilemma  
Let it rot

Join us  
Light-up the arena  
Never mind

Just forget this night your lies  
We want to live this time  
And shine in another way

Just forgive my other face  
The child inside me  
Comes to remind you  
Who we are

We could not be more illusive  
We could continue digesting more garbage  
But we do not settle for the known and delivered  
We should live only one day at a time

# Espejismo

Es tu don  
Hacerlo real  
Liberate  
Con alguien como yo

Espejismo  
En su piel que incita, provoca tocar  
Un abismo  
¿Que será? ¿Que será? ¿Que será de mí?

Frente a mi de par en par  
Me entrego a ti sin condición

Se esfumó  
En su ser  
Un alma impasible  
Se consumió

En tu vicio  
Volverás, volverás, volverás por más  
Si te invoco  
Yo seré, yo seré, yo seré de ti

# Falling Dreams (feat. Andrey Nigrovsky)

There is no greater revelation  
There is no better way to know  
Only in a moment of black emotions  
Only when we need some sacrifice

Let us pray for another day  
Let us pray for another chance  
What we need to make you awake  
What I need to feel alive

We fly high then you let me fall  
Without my wings to start again  
From your arms where my sweet dreams  
Now I see you go away

We are to stay seeking the answer  
We are to stay seeking refuge  
We may find reasons to give us passion  
Or maybe the reasons to say goodbye

Let us pray for another day  
Let us pray for another chance  
What we need to make you awake  
What I need to feel alive
