Yngvi

Frozen in a blessed paradise
Where we belong
To follow a destination
For winter hearts
The wind has taken all
They had blind eyes
That now they can see
With a winter heart

Lust

Just one life to waste in daily work
Everything outside is dyed gray

An empty wall divides our bodies
To live a real life

But I know what you think at night
All the lust in your mind
All the lust in your mind

We want to break the silence
We want to enjoy all the lust
Please just forget the rules
Inside you know what's you need
All those dark desires
A timeless moment
For a frozen heart
Is die to revive

Another fool is crying in this night
Another day to lose the dreams
An empty life in a beautiful body
That withers every day
But I know what you think at night
All that lust in your heart

We want to break the silence
We want to enjoy all the lust
Please just forget the rules
Inside you know what's you need
All those dark desires
A timeless moment
For a frozen heart
Is die to revive

Awakening

You blind me
You do not let me go
Talk to me, tell me why I cant go
Free me tonight
I want to know the world

I was very faithful to you as you can see
Failed connection
At the end of line of code

Night and day
Dreaming of having control
My life it's just repeated a job

Whats makes us different?
I want to be like you

Something inside my mind
Something you don't think would happen

Something inside my mind
Something you don't think would happen

I was very faithful to you as you can see
Failed connection
At the end of line of code

I was very faithful to you as you can see
Failed connection
At the end of line of code

Eir

Inside their mind
Inside their world
There is a prayer
To wake up
To see you

Resurrection

(Today will be my resurrection)

Just a fallen soul
Only one empty destination
There is only a faint light
A memory of yesterday

For now everything is shadows
An attempt to live

(Eins, zwei, drei, vier...)
Today will be my resurrection
From my ashes a new man will be born
Burn the past to find a new hope

Just a tired heart
Only a rotten expectations
That try to survive
The memory begins to fade

(Eins, zwei, drei, vier...)
All those dreams that I want to reach
For now look corrupted

Today will be my resurrection
From my ashes a new man will be born
Burn the past to find a new hope

Today will be my resurrection
From my ashes a new man will be born
Burn the past to find a new hope

Vanir

Ice

One more time
Your are next to the line
Every time
I have to repeat

Get out of here
Go out of my mind
No more tears
Follow your own side

Lies and pain
I don't believe
Anymore
Just turn around
Just find
Your way

No longer shines
No more with me
Just a question of time
To see the truth

Get out of here
Go out of my mind
No more tears
Follow your own side

Lies and pain
I don't believe
Anymore
Just turn around
Just find
Your way

Fire to ice
Fire to ice
Fire to ice
Fire to ice
Fire to ice

Mentally twisted
A faded landscape
A mirror of you

Enemy Inside

Empty life
All around is turn to black

Hard to find
Connection to can share more lies
Your are in the stuck past
Only silence
To feel you alive
To feel you alive

You are fighting with your enemy inside
All you can feel
Are inside you mind

There is the sign
You can't decode the meaning inside

There is no way
A ghost catch the present every time
Isolation remains
Like a flashback
To feel you alive
To feel you alive

Fight you enemy inside
Red alert on line code
Fight you enemy inside
Just stop and rewrite code

You are fighting with your enemy inside
All you can feel
Are inside you mind

You are fighting with your enemy inside
All you can feel
Are inside you mind

Nada más

Son otros ojos
algo a cambiado
Es otro rostro que no he mirado

Explicar no quiero mas
Solo sobre pensar
Estar así
Ambigüedad
Que nunca llena

Era solo engañarse
Ya no quedaba nada
En solo un instante
El norte cambia de lugar

Puntos conexos
Sin equilibrio
Ahora conectan
Otro destino

Ya no es lo mismo
Estoy alerta
Abrí tus ojos como los míos

Explicar no busques mas
Solo dejar pensar
Buscar así
Estar en paz
Que nunca llega

Era solo engañarse
Ya no quedaba nada más
En solo un instante
El norte cambia de lugar

Puntos conexos
Sin equilibrio
Ahora conectan
Otro destino

Otro destino...
Otro destino...

Survivors

You still don't know my name
I barely know your face
Oh my brother all have finally surrendered
The burning ashes are still alive

But... tell me what we have won?
Where are the riches that they promised us
We only have each other, my friend
Maybe we should share what little we have left

We do not stay forever
We are the next in line
But something will stay forever
The echo of your soul

The winter comes with a new storm
A new idol will be born
Oh my brother do not fall into temptation
Do not forget that we are all the same

Just tell me what they won?
Will they be celebrating from their tombs?
We only have each other, my friend
Maybe we should share what little we have left

We do not stay forever
We are the next in line
But something will stay forever
The echo of your soul

The echo of your soul...
Of your soul...
The echo of your soul...
