Ragnarök (Begins)

In the name of faith,
In the name of love,
we go crazy
we stay naked

we lose our world
we lose our mind
for an instant

Then you feel the loss
you seek to repair
they ignore you
nobody understands you

You are not here
I'm not with you
error

We always search
always be the best
society suffocates us
thousands of opinions
a virus in your mind
a virus drives you
down to the bone

someday
you will see more clearly
and I will give you my hand
as I always did

Without lies
Without lies
without any more lies

Fell in From Stars

To want to know
Crossing flashes of light
Blinding harmony
Everything looks white

Synchrony
Words come true
Something missing
In this darkest night

The hidden has
Been revealed
Make reality
Cross to the other side

Maybe it's love
I think you want to know
This is the secret game
You will never want to leave

I last fell in from stars
Hold me tight in your breast
Melt me into your golden legs
Carve my name in your garden

On knees the confession begins
Your most devoted preacher is born
A desperate cry of lust
Shall only pass this once?

Crucified Me

The only one that keeps me here
The only thing that twists my mind
An invisible attraction to your warmth
A shock of electricity on my skin

You crucified me
In the blessing of your body
You drowned me
in the ocean of your sins

You killed me
In the sweetness of your soul
You gave me life back
To reach infinity

I don't want to leave this torture game
you have driven me crazy
And for me it has become a paradise
adrenaline rush in my blood

Angels in the Dark

Dancing under the stars
Shutting down silence around
Holding in my arms
What's left inside

A thorn stuck in my mind
Blaming to the past
Looking for a world
To make a new creation

No answer from the sky
Never on my knees for life

We are light
We are angels in the dark
Shining bright
Crossing slowly from the other side
Even being alone
Looking for a way in life
We are light
We are angels in the dark

Leaving everything behind
False illusion of life
Now you can see
A new of reality

Only humans is what we are
Only humans awakening
Wishing to be free

Everything is clear in the distance
Everything is clear after the storm
Everything is clear leaving the past
Everything is clear crossing the void

Endure

War won't change our minds
The war won't steal our faith

Lost Generation (feat. Henrik Iversen)

The change has begun
To modern concepts
A curse, individualized
We will never be the same again

We are staying alone
We are all full of fear
We are running out, of faith
The fight for love seems over

We did not realize
We go with the flow
We are here
With everything and nothing
Will we ever find out where we are going?

We have become a construction
We have become a product
We are the lost generation
We have forgotten who we are

And I love so much
I have some fear
Your are my love

Epiphany

You are for me, the moon
soft light and inspiration

Tonight
you and I
We'll be stay together

I don't want to stop
see your beautiful face
never stop
be with you

I don't want to stop
this beautiful dream
never stop
be one soul

Reach the Edge

Even when I was alone
Crossing the ocean and the storm

Searching for answers
Searching for answers

in the end
In our minds
Everything should be like this
For a lifetime

Sometimes you don't understand me
For my strange behavior

Searching for answers
Searching for answers

On the way to the faith
we can get lost in the night
Sometimes

All the things I've done
It's all I wanted
All I wanted
If you want to stay with me
You will always be by my side
Forever with me

All the things I've done
It's all I wanted
All I wanted
No regrets inside of me
There is nothing to forgive
We just have to say it
We'll be together

Freedom

History repeats itself
The thoughts burning your mind
Then you see
Irony

So you go round and round
And hate doesn't let you breathe
To be free

We are fighting for freedom
We are getting ready to fly
We're waiting for a sign
We are waiting only for you

we're fighting over meaning
Come with me and take my hand
So together we'll be free
A new story in our lives, again

A new discord in your mind
Again you lose your faith
So you feel
Agony

Just Human...
Just Human...

Again, to be free again
