Wonderland

Since the day I lost
My belief in dreaming
It's a breach of trust
And life has no meaning

Anything I feel
Doesn't make me happy
That's the way it goes
I messed up so badly

I messed up so badly

Like Alice in Wonderland
We're digging holes in the sand
And trying to understand
The mystery of everything
Like Alice In Wonderland
Looking for a helping hand
To guide us through no man's land
Let's hope that it's not the end

On the way to the top
Because life is a journey
There ain't no turning back
But we are in no hurry

Always step by step
You've got to keep going
It's the end of the road
Nobody saw it coming

Nobody saw it coming

Like Alice in Wonderland
We're digging holes in the sand
And trying to understand
The mystery of everything
Like Alice In Wonderland
Looking for a helping hand
To guide us through no man's land
Let's hope that it's not the end

Like Alice in Wonderland
We're digging holes in the sand
And trying to understand
The mystery of everything
Like Alice In Wonderland
Looking for a helping hand
To guide us through no man's land
Let's hope that it's not the end

Like Alice in Wonderland
We're digging holes in the sand
And trying to understand
The mystery of everything
Like Alice In Wonderland
Looking for a helping hand
To guide us through no man's land
Let's hope that it's not the end

Let's hope that it's not the end

Heart of Stone

If you choose to rise above
Someone has to take the fall
Don't get me mad, what should go wrong?
Life is a challenge and you are strong

Don't keep staring at the sun (Don't keep staring at the sun)
Look at me what I've become (Look at me what I've become)
Why does it hurt to be alone?
You never break a heart of stone

Just be grateful for what you have
Or do you want to question that?
Take a deep breath and be prepared
Instead of complaining about it

Don't keep staring at the sun (Don't keep staring at the sun)
Look at me what I've become (Look at me what I've become)
Why does it hurt to be alone?
You never break a heart of stone

Why does it hurt to be alone
You never break a heart of stone

Don't keep staring at the sun (Don't keep staring at the sun)
Look at me what I've become (Look at me what I've become)
Why does it hurt to be alone?
You never break a heart of stone

Don't keep staring at the sun (Don't keep staring at the sun)
Look at me what I've become (Look at me what I've become)
Why does it hurt to be alone?
You never break a heart of stone

Every Now and Then

I always want to be first
In a world of caress
Just be good to yourself
And save the best for last

Something is dragging me down
I have the strength to resist
Whatever problems I get
I try to give my best

Hold me tight, never let me down
I need a place where I feel safe and sound
Open your eyes and you will see
The world that we live in is for you and me
Hold me tight, never let me down
I need a place where I feel safe and sound
Open your eyes you know who I am
I need to be controlled every now and then

I always want to be right
Even if it's not like that
Never give up on yourself
There is no room for regret

I always look straight ahead
But sometimes I'm just too blind
If there is no second chance
Let's try it one more time

Let's try it one more time
Protect me from the evil
Save me from myself

Hold me tight, never let me down
I need a place where I feel safe and sound
Open your eyes and you will see
The world that we live in is for you and me
Hold me tight, never let me down
I need a place where I feel safe and sound
Open your eyes you know who I am
I need to be controlled every now and then (Save me from myself)
Hold me tight, never let me down
I need a place where I feel safe and sound (Protect me from the evil)
Open your eyes and you will see
The world that we live in is for you and me (Save me from myself)
Hold me tight, never let me down
I need a place where I feel safe and sound (Protect me from the evil)
Open your eyes you know who I am
I need to be controlled every now and then (Save me from myself)

I need to be controlled every now and then
I need to be controlled every now and then
Hold me tight never let me down
I need a place where I feel safe and sound (Protect me from the evil)
Open your eyes you know who I am
I need to be controlled every now and then (Save me from myself)

Head Over Heels

Running out of time
Nothing changes my mind
Same stupid boy who plays with fire

Not to be undone
Now I am alone
Living a life full of desires

And of course I knew it right away
Apparently, today is not my day

Can you hold me when I stumble?
Will you catch me when I fall?
Will you be there when I'm lonely?
Can you save me from it all?

I feel hypnotized
Like I'm paralyzed
Don't pour oil into the fire

There's much more to be done
But I'm still on the run
Somehow it seems I have lost my way

And of course I knew it right away
Apparently, today is not my day

Can you hold me when I stumble?
Will you catch me when I fall?
Will you be there when I'm lonely?
Can you save me from it all?

Can you hold me when I stumble?
Will you catch me when I fall?

Will you be there when I'm lonely?
Can you save me from it all?
Can you hold me when I stumble?
Will you catch me when I fall?
Will you be there when I'm lonely?
Can you save me from it all?

Discipline

Sometimes when life treats you bad
You know it too well and it just make you sad
It's hard not to be afraid
Just show your courage cause it's never too late

Do what has to be done
Do what has to be done as long as it could be done
Do it that way all the time
Do what has to be done
Do what has to be done

You've got no reason to frown
Keep your head up not let it get you down
Keep calm people behave wrong
Be sure to thank them for making you strong

Do what has to be done
Do what has to be done as long as it could be done
Do it that way all the time
Do what has to be done
Do what has to be done

Transcendent

The Great Unknown (album) (feat. Kirlian Camera)

A million miles from here to all eternity
The heaven full of stars at night
Far beyond the limits of the galaxy
A silhouette glows in the sky

Nobody suspected this huge catastrophe
No doubt it's clearly our own fault
Now we are facing the apocalypse
We lose ourselves in the great unknown

And when winter comes I shiver in the cold
Thousands of white snowflakes fall from the sky
And when the wailing of the wolves fades with the sun
Look at the firmament, it has begun

It has begun

Remember all this precious memories
This little piece of heaven on earth
Take a deep breath before we fall from grace
Watch the sunset as we fall

And when winter comes I shiver in the cold
Thousands of white snowflakes fall from the sky
And when the wailing of the wolves fades with the sun
Look at the firmament, it has begun

It has begun

End of Story

Like a devil in disguise
Out of nowhere by surprise
Never felt this way before
Just get up and shut the door

Every story has an end
You can't ignore it
Get your head out of the sand
Stand up and show it
Nobody has a masterplan
You should start running
It makes no difference in the end
The world still turning

Like as stranger in the dark
Carry the fire, light the spark
Count the moments, not the time
Relive the memories in your mind

Every story has an end
Get your head out of the sand

Every story has an end
You can't ignore it
Get your head out of the sand
Stand up and show it
Nobody has a masterplan
You should start running
It makes no difference in the end
The world still turning

Every story has an end
You can't ignore it
Get your head out of the sand
Stand up and show it
Nobody has a masterplan
You should start running
It makes no difference in the end
The world still turning

Self-Fulfilling Prophecy

My head is spinning
Round and round
So sick of people
I'm losing ground
But the battle has just began

It's so frustrating
What have I done?
Life's disappointing...
...for everyone
But the battle has just began

All the worries inside me
Nobody here to set me free
It this all I'll ever be
A self-fulfilling prophecy

I'm so exhausted
The same routine
Tired of screaming
No self-esteem
But the battle has just began

My world is shaking
I'm lost for words
Still suffocating...
...in my own thoughts
But the battle has just began

All the worries inside me
Nobody here to set me free
It this all I'll ever be
A self-fulfilling prophecy

All the worries inside me
Nobody here to set me free
It this all I'll ever be
A self-fulfilling prophecy

In Agony

Running for shelter
Running the way
Feeling the empty
Longing for change
Locking for cover
Passing the blame
What is the reason?
It's hard to explain

What is the reason?
It's hard to explain

My mind's so numb
My heart so weak
The pain I feel feels to real
I bare my soul of all to see
I live this life in agony

Running for shelter
Running for pain
Never belonging
Always betrayed
Living a nightmare
Growing insane
What is the answer?
It's hard to explain

What is the answer?
It's hard to explain

My mind's so numb
My heart so weak
The pain I feel feels to real
I bare my soul of all to see
I live this life in agony

My mind's so numb
My heart so weak
The pain I feel feels to real
I bare my soul of all to see
I live this life in agony

I bare my soul of all to see
I live this life in agony

Träumen (feat. In Strict Confidence)

Und du suchst das Glück
Es fehlt stets ein Stück
Fernab deines Weges gibt es kein zurück

Und du läufst davon
Immer hinterher
Das Ziel in der Ferne, doch dein Blick so leer

Hab' keine Angst vorm Träumen
Halt dich fest am Licht
Auf deiner stetigen Suche, hab immer Zuversicht
Hab' keine Angst vorm Träumen
In dieser finsternen Nacht
Die Hoffnung stirbt als letztes
Dein Glaube gibt dir Kraft

Und du gibst nicht auf
Fällt dir wieder schwer
Am Ende deiner Reise führst du den Schmerz nicht mehr

Und du hältst dran fest
Für den Augenblick
Im Gesicht eine Träne, schaust du kurz zurück

Hab' keine Angst vorm Träumen
Halt dich fest am Licht
Auf deiner stetigen Suche, hab immer Zuversicht
Hab' keine Angst vorm Träumen
In dieser finsternen Nacht
Die Hoffnung stirbt als letztes
Dein Glaube gibt dir Kraft

Hab' keine Angst vorm Träumen
Hab' keine Angst vorm Träumen

Hab' keine Angst vorm Träumen
Halt dich fest am Licht
Auf deiner stetigen Suche, hab immer Zuversicht
Hab' keine Angst vorm Träumen
In dieser finsternen Nacht
Die Hoffnung stirbt als letztes
Dein Glaube gibt dir Kraft

Sea of Love (feat. Patrik Hansson)

You see me, you heal me
I can't explain what to do but I need it
The endless flow of energy you pierce through me

My heart's bouncing, I'm drowning
In the sea of love that is all around me
The endless flow of energy runs through me

I can see the power of life is burning in your eyes
No words to find, I can't describe my feelings deep inside
You push me on into the night, not known what to find
You're the one, you make me lose my mind

I can't believe it
How could I be so blind?
I never thought that we could be like one

But now I see it was not hard to find
It fills my mind
The endless flow of energy you bring to me

I can see the power of life is burning in your eyes
No words to find, I can't describe my feelings deep inside
You push me on into the night, not known what to find
You're the one, you make me lose my mind

You're the one, you make me lose my mind

I can see the power of life is burning in your eyes
No words to find, I can't describe my feelings deep inside
You push me on into the night, not known what to find
You're the one, you make me lose my mind

Anyone Out There (feat. Gabriella Åström)

Really, do you think that I care for you?
Sadly I won't find my way if you don't leave me astray
Believe me I tried
I left my darkness to change and to go my own way

Is anyone out there?
I'm lost, I'm left for you to find
I'm the one in the dark
My tears will make me drown

Is anyone out there?
I'm lost, I'm left for you to find
I'm the one in the dark
My tears will make me drown

Lately I start to fall apart, I see it clearly
Don't we lie just to feel a little lighter?
We stay, believe me at night
I'll keep on breathing, I scream: "I will go my own way!"

Is anyone out there?
I'm lost, I'm left for you to find
I'm the one in the dark
My tears will make me drown

Is anyone out there?
I'm lost, I'm left for you to find
I'm the one in the dark
My tears will make me drown

So Bizarre (feat. Beyond Obsession)

Been standing here for a while
And I'm slowly wondering why bad things happen all the time

Everything always goes wrong
If I'm too weak you are too strong, in the end every one stands alone

Is it time for letting go?
All the things we used to know
Does it make us who we are?
No matter how it used to be
Foolishness is just killing me
But the truth seems so bizarre

Not smarter than before
I keep trying to open that door, but I lost the key once more

It always seems the same
I try to figure out the sense of the game, but in the end I seem to fail again

Is it time for letting go?
All the things we used to know
Does it make us who we are?
No matter how it used to be
Foolishness is just killing me
But the truth seems so bizarre

It's time
I'm not alone

Is it time for letting go?
All the things we used to know
Does it make us who we are?
No matter how it used to be
Foolishness is just killing me
But the truth seems so bizarre

Is it time for letting go? (Is it time for letting go?)
All the things we used to know (All the things we used to know)
Does it make us who we are?
No matter how it used to be (No matter how it used to be)
Foolishness is just killing me (Foolishness is just killing me)
But the truth seems so bizarre
