The Beginning of the End

Kosmonauta

Fino al cielo

Nell'infinito

Venti secondi al lancio

Enforcer

The planets are changing
Their magnetic fields
Energy fields, brightness
And their atmospheres
When Voyager 2
Flew over planet Neptune
It was offset
From the rotational pole

Re-location of mankind enforced

Our solar system is about to shift
The glowing plasma
Has recently increased
Energy flowing into the sun
Spreading it out along
Its equatorial plane

Systematic removal enforced

Destinazione Spazio
Vola Kosmonauta
Destinazione Spazio
Vola Kosmonauta

Future Storm

There's no solution
There's no salvation
No redemption for planet Earth
You tried to hide
You tried to fight
But your planet is gonna die

You won't survive
You stand in line
Waiting for execution
Forced to believe
This is for real
The master of darkness will come
The master of darkness will come

We can't overcome
No, no - No way out

Now the sky
Fades to black
No escape
From deadly wrath

Empire of the Sands

Since the celestial fall
In the dark light they stand
A memorial of forgotten gods
The Empire of the Sands
Since the galactic blow
In the cold night they stand
High and mighty they call
The Empire of the Sands

Forgotten lands of waste
Now cast to oblivion
Hidden in the dust
Of timeless religions

Time goes by and still
Kings rise and fall
Since the dawn of time
To the very last call

In the dark light they stand
In the cold night they stand

And our memory fades
Like dust in the shade
Our kingdom once ruled
Turns to sand in our hands

Blue Moon

Now I have to leave
I have to go away
I'll cross the sky
Waving goodbye
Heading for space
There's nothing left
That I can do
To save my blue moon
No more summer nights
Clouds in the sky
I wave goodbye

Navigation

Loneliness and emptiness
Since I left all behind
Only memories in my mind
Blue lights from the screen
Black universe all around
And I can't hear no sound

Everything is lost
Everything is gone
Everywhere I go
I find myself alone

Endless days passing by
I have fallen too deep
I navigate and dream
Blue lights from the screen
Black universe all around
And I can't hear no sound

Beyond the Sun

Space Overdrive

Fear is gripping me so tight
My starship is drifting
Aimless in flight
It's time to activate my mind
Mechanical pilot now comes alive

Storms of electricity
As digital implants are powering me
But now, running through the void
I can't stand the warp
Even if I'm a droid

Deep in my synthetic soul
I am falling down out of control
Light years of silence and stars
Will I return back to the sun

Space is cracking up my brain
Falling to pieces
I can't stop my pain
A war inside my head
Invisible forces are driving me mad

Cosmic Gate

(Message: Approaching cosmic gate. Final sequence.)

(Message: Approaching cosmic gate. Final sequence.)

Trasportato dalla luce
Nella quinta dimensione
Sto viaggiando nello spazio
A curvatura nove
Totalmente disconnesso
Ho una nuova autonomia
Sento il suono del silenzio
In stereofonia

On golden wings I fly
Like thunder from the sky

My destiny awaits
As I cross the cosmic gate
Shining like a ray of light
Like a comet in the night
Eternity awaits
As I cross the cosmic gate

La materia si dissolve
Con lampi di energia
Ionizzando le mie molecole
In lenta sincronia

(Final sequence.)

On golden wings I fly
Like thunder from the sky

My destiny awaits
As I cross the cosmic gate
Shining like a ray of light
Like a comet in the night
Eternity awaits
As I cross the cosmic gate

Urania

Alla luce di un nuovo sole
Spazio e tempo sono senza nome
Senza più identità [Urania]
L'infinito non ha confine
E' uno spazio che non ha mai fine
Lasciando l'umanità [Urania]
Il passato, dimenticato
Una stella che non ha vissuto
Anni luce da qua [Urania]
Visualizzo, non sono solo
Alzo gli occhi, poi le mani al cielo
Vedo l'immensità [Urania]

Million miles across the universe
I was guided by the light
I hear the bells of liberation
As I cross the sands of time [System Overdrive]

Nova 4001

E' la fine del viaggio
O forse l'inizio
E ogni meta e' inutile
Per una volta posso dirmi felice
Non per assenza di gravità
Mi sento leggero...
