We Are Stars

We are stars and we shine so bright
We are stars we come out at night
Standing still in the silent sky
Seen afar, we are stars

We are stars, shining bright

Vectorial Trace

I am sending my last call
Do you see me standing tall
Watch me now before I fall
From the edge of the real world

Vectorial Trace
A sequence in space
A new interface
Vectorial Trace

I am sending my last call
Do you see me standing tall
Watch me now before I fall
Eternally, away from all

Vectorial Trace
A sequence in space
A new interface
Vectorial Trace

Distance

Too many days I've been waiting for you
Wasting my time, watching the blue

If you want to call me
From the fading distance I will say

The sun goes down
Watch the clouds
Flying by

The sun goes down
It's over now
Close your eyes

You can call my name, but I'm far away
You can call my name, but it is too late

Ecstasy

Your eyes are gleaming bright
They are sending me a light
Don't care what people say
Look at the me, I'll show you the way

My dimension, your sweet passion
Your heart of stone breaks up once more
Your dimension, my obsession
You're leaving me in deep ecstasy

A passenger caught in your dreams
I'm breathing your atmosphere

My dimension, your sweet passion
Your heart of stone breaks up once more
Your dimension, my obsession

Underwater

In the blue your legs are branches
Waving in the unknown
And the rocks you're diving from
Walls thrust into the abyss

I can't hear you, the sea's so silent
Miraculously silent
But I know you're calling me
Calling me to our world

I don't want to go back
Feeling much stronger
Being much weaker

And please if you've ever loved me
And please if you've ever hated me

Let me go down into this realm
Of darkness where no shadows are fallin'
Let me go down until I need
To rise up and breathe like a dolphin
Let me go down again
Let me go down underwater

Into the Fire

Ready for take off the starlight awaits
Over the sky, out into space
No return, a silent run
I will die in the shine of the sun

Set my soul on fire
The flames are reachin' higher
I am burning

Like a fire I am burning

Set my soul on fire
The flames are reachin' higher
I am burning

Into the fire I am burning
