Artifact I

Propulsion

And as we fly
Reaching for the speed of light
Realities collide
When engines optimize

Phase 1: Artifact discovered
Phase 2: Reverse engineering
Phase 3: Implement technology
Phase 4: All systems go

In the blink of an eye
We were turning the tide
Rearranging time
History was redefined

And as we fly
Reaching for the speed of light
Realities collide
When engines optimize

Antimatter propulsion
Blueprints redesigned
Deployed into the system
Breaking waves
Our weapon of expansion
Created to investigate
Forging our destiny

The construction of our future
In the brilliance of the burning sun
Challenged human nature
As the fragments joined as one

And as we fly
Reaching for the speed of light
Realities collide
When engines optimize

The shattered realms behind us
Pushed back into the void
The universe before us
Reveals a new dawn

Milestone

Sometimes you reach for something distant
An elusive feeling you can't explain
Your thirst is everlasting but my faith is unbreakable
Still I know that in the end...

Together we will find our own perfect symmetry
Our way towards serenity
Together we will find our own perfect harmony
An everlasting greatness

Sometimes you question your own purpose
Contemplating the paths you didn't fake
Seeking comfort in total isolation
Lying restless asleep but wide awake

And I'll wait here for you
'Cause I know you'll see it too
Outside this earthly cage
There's an endless sky

Together we will find our own perfect symmetry
Our way towards serenity
Together we will find our own perfect harmony
An everlasting greatness

Artifact II

Bulldozer

The tyrants of the decadent
Reassembling the elements
Bringing order to the eminent
Wreak havoc on the dissident

Destroy, eliminate
Deploy the machine of hate
Biomechanical-Command-Interface
Your whole future erased

The tyrants of the decadent
Reconstructing the development
Control the minds of the sentiment
Wreak havoc on the dissident

Destroy, eliminate
Deploy the machine of hate
Biomechanical-Command-Interface
Your whole future erased
Destroy, terminate
Bulldozer becomes your fate
Neurocybernetic response engaged
Your whole future erased

Destroy, eliminate
Deploy the machine of hate
Biomechanical-Command-Interface
Your whole future erased
Destroy, terminate
Bulldozer becomes your fate
Neurocybernetic response engaged
Your whole future erased

Revoltage

Desolate plains, seared terrains
Nothing left for the human race
Stains of oil on rotten soil
Slaves of flesh work and toil

Metal mass times infinite
Revoltage forces reign supreme
Indoctrination is our goal
Synthetic life will take control

Their human rights have been stripped
All resistance we restrict
Their failed society transformed
Advanced robotics is reborn

Metal mass times infinite
Revoltage forces reign supreme
Indoctrination is our goal
Synthetic life will take control
We are legion overlords
Vanguards of the A.I. horde
Assimilation is our goal
Synthetic life will take control

Artifact III

Vimana

Departed

I vaporized the tangible reality avoiding me
I synchronized out of time
Disrupting the beat

When we started
I knew it would be the same again
So I departed to be alone
I search of my humanity

With every step I'm looking back
Wish I could intercept and rearrange the facts
But here I am and I'm all done with broken hearts

When we started
I knew it would be the same again
So I departed to be alone
I search of my humanity

Artifact IV

Neoexogenesis

Conquering distance in the interstellar void
Planting new beginnings
A voyage through the darkness in search of the light
Enhancing progress to endure the fight

Fulfillment of the prophecy
Ancient chronicles combined
Nothing left to contingency
Life will ascend from what is left behind

Beyond event horizons
Impressions in eternity
Crossing vast dimensions
Artifacts of singularity

Carving our image into the stars
With the seed of recreation
Neoexogenesis
The way towards salvation

Beyond event horizons
Impressions in eternity
Crossing vast dimensions
Artifacts of singularity

Traveler

Seeking shelters from the night
Drowning in liquid dreams
Trying hard to breathe

Once again you're lying there
Half awake alone again
Wasn't the last time, the last time, my friend

You're a traveler
In a distant world
Moving underground
No sight, no sound

Without my guidance through the neon night
When all is lost and I am out of sight
Will you cry out?
Will you scream my name
Just a lonely traveler
An echo in the rain

You're a traveler
In a distant world
Moving underground
No sight, no sound
